

Excavation & Construction Equipment Repair

Heavy equipment used for construction, installation or farming can be very difficult to maintain. Many of our customers are stuck between a rock and hard place—costly replacement or try to remain productive using worn out equipment until it becomes inoperable. At Valley Fabrication in LaSalle, Illinois we have been working with our customers for over 45 years in cost-effective, custom repairs on equipment. We help to extend operational life-time, improve productivity, and maintain safe operating conditions.
